

New MRC funded PhD projects- 2015 entry

Trials Methodology Research

MRC

Hubs for Trials
Methodology Research

Our PhD programme presents a unique opportunity to undertake training for a PhD in trials methodology research.

Up to 20 new MRC PhD projects are available at locations across the UK.

Trials methodology covers all aspects of the trials development pathway, supported by the Network, a UK resource to improve the design, conduct, analysis, interpretation, and reporting of clinical trials.

We have projects suitable for **statisticians, mathematicians, biologists, health economists, qualitative researchers, epidemiologists, psychologists, social scientists, health service researchers**, and those with appropriate qualifications currently working in trials.

Projects are available at universities across the UK. See www.methodologyhubs.mrc.ac.uk for details

Package includes an enhanced student stipend of **£19,726** per year for projects in London or **£17,726** per year for projects elsewhere (a clinical salary for some projects is available for clinically qualified candidates – see website for details)

Due to funding restrictions only home/EU applicants are eligible for funding through this programme. Eligibility and residence requirements must be met.

Deadline for application forms is 24 November 2014.
