All welcome

Professor Helen Colhoun

Helen Colhoun is Professor of Public Health at the University of Dundee and Honorary Consultant in Public Health NHS Fife. She joined the University of Dundee and NHS Fife in September 2007 having previously held tenured professorial posts in epidemiology at University College London and University College Dublin. Her major research interest is the epidemiology, including genetic epidemiology of diabetes and its complications. She leads the Biomarkers programme of the EU-IMI SUMMIT programme and leads the enabling for research purposes of the national e-health records for diabetes in Scotland.
