All welcome

Professor Martin Björck

Martin Björck is professor of vascular surgery in Uppsala, Sweden. He chaired of the Steering Committee of the Swedish National Registry for Vascular Surgery (Swedvasc) 2002-7. The registry established national coverage of all Swedish hospitals in 1994 and has registered over 150,000 operations.

He also chaired the International Vascunet Committee 2003-6, an organization which aims to promote excellence in vascular surgery by means of international vascular audit.

His main research interests are in abdominal aortic aneurysm epidemiology and its screening.
